- Coates, J. M., R.S. Foster and B.M Sewell, 1966. Excavations at R11/1394 (Hawkins Hill), Tamaki, South Auckland. Auckland Conservancy Historic Resources Series No. 13. Department of Conservation. (36 pp incl. 16 figs. & 8 tables)

An archaeological site, R11/1394, was excavated prior to development of an industrial subdivision. Evidence was found of storage pits, cooking, a house and stone tool manufacture and use. Occupation was placed in the 16th century AD and the site has been interpreted as a

small undefended settlement typical of this part of South Auckland at that time with small hamlets scattered throughout the volcanic areas surrounding the cones of Otahuhu and Te Apunga O Tainui, although the presence of moa bone and dentalium shell is unusual in an Auckland site of this age.

- Fredericksen, C. 1996. An archaeological survey of a proposed forestry Block, Diggers Valley, Northland. Report for McCarthy Family Trust. 14pp.
- Fredericksen, C. 1996. An archaeological inspection of three quarry localities, Northland. Report for VK Consulting Environmentl Engineers Ltd.
- Maingay, J. 1996. Archaeological observations on Great Island, December 1995. Department of Conservation. 5pp.
- Petchey, P.G. 1995. Home Reef Resource Consent Area, Macraes Gold Project, Archaeological Survey. Report for Macraes Mining Co. 45pp plus SRFs.
